NEW BEGINNINGS MENTORSHIP PROGRAM 2025-26 ODD SEM

Prepared By Swati Karle

Objective:

In the odd semester of academic year 2025-26, the New Beginnings Mentorship Program was introduced for the students who have entered the 1st year and are making a new beginning in the college ecosystem. As the environment is new, there are a lot of questions running in the mind of these students for which they need guidance. Through the New Beginnings Mentorship Program, seniors from 3rd year volunteer to provide the much-needed hand holding required by their fellow first year juniors, offering them support and guidance whenever they need. It's a great way to bond and build a sense of community and ensure that these new students feel supported by someone who has already been through similar experiences and navigated his/her way ahead.

Below are a list of objectives for this initiative:

- To help 1st year students get familiar with the new ecosystem
- To help them with the personal, academic or any other challenges
- To help them get guidance on studies, assignments, projects, committees, clubs among other things
- To help the students bond and build a sense of community among themselves
- To help students with disabilities cope with the pace of studies

Methodology:

The program runs through four structured mentoring phases to ensure holistic guidance.

Phase 1: Know Your Mentees :

In this phase, mentors are expected to interact with each allocated mentee to understand their personal, social, and academic background. The mentors will also help them with any clarification regarding college ecosystem, activities and committees. A questionnaire was provided to guide these conversations.

Phase 2: Identifying Issue Areas :

During this phase, the mentor will check on their mentees for their academic, personal and social progress having spent some time in the college ecosystem. In this phase mentors will document the top 3 areas where the mentees are facing issues and mutually agree with the mentee on how to work on these areas. This phase focuses on establishing deeper connections and providing structured guidance where required.

A questionnaire was provided to guide these conversations. Based on these interactions, mentors can help understand and identify areas where the mentees are facing issues in coping.

Phase 3: Monitoring and Documenting Progress :

Once the issues have been identified on the academic, personal or social fronts and probable solutions discussed, in this phase mentors will keep a check on their mentees and track them on how they are progressing with respect to the issue areas they have mentioned in the previous phase. The format in which the tracking will be done is attached below.
